As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency might minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record.

We will include or summarize each comment in our request to OMB to approve this ICR. Abstract: The Free Use vegetative permits are available for Mining Claimants, Federal, State, Territorial agencies, municipalities and associations or corporations not organized for profit and they must certify that the materials will not be used for commercial or industrial purposes. Free Use Permits for Mineral Materials are available to any Federal, State, or territorial agency, unit, or subdivision including municipalities or any non-profit organization. OMB Control Number 1004–0001 authorizes the BLM to collect information to continue the use of separate permit forms for the free use of vegetative materials and mineral materials. There are no changes proposed for the forms. We are, however, adjusting the total estimated annual burden hours from 124 hours to 73 hours, a reduction of 51 annual burden hours. The reduction of annual burden hours results from adjusting the number of estimated annual response from 247 to 146. The number of annual responses is being adjusted to reflect the average number of applications received by the BLM over the past three years. This OMB Control Number is currently scheduled to expire on January 31, 2023. The BLM plans to request that OMB renew this OMB Control Number for an additional three years.

An agency may not conduct or sponsor and, notwithstanding any other provision of law, a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.
